

Kyoto Green Report

On the subject of global warming, Canada has unveiled its blueprint to cut greenhouse gas emissions. Project Green details how the country will honor its commitment to the Kyoto Protocol, calling on the government to invest about \$10 billion (Canadian) between now and 2012. In the coming months UTILITYnet will be adding features of its Green Report System to its RISS business reporting application. If you are interested in learning more about the Green Report application – contact Nick Clark, Managing Partner UTILITYnet.
